

VIT-SMARTBRIDGE EXTERNSHIP PROGRAM

INTERNET OF THINGS

ASSIGNMENT-3

NAME: AMRITH SRIRAM

MAIL ID: amrith.sriram@gmail.com

Develop a code to upload the water tank level and light intensity values to the IBM IoT platform and visualize them in the web application.

Python Code:

```
import wiotp.sdk.device
import time
import random
myConfig = {
    "identity": {
        "orgId": "d9cbnt",
        "typeId": "FirstDevice",
        "deviceId": "14831"
    },
    "auth": {
        "token": "Amrith14857"
    }
}

def myCommandCallback(cmd):
    print("Message received from IBM IoT Platform: %s" %
cmd.data['command'])
    m=cmd.data['command']
```

```

client = wiotp.sdk.device.DeviceClient(config=myConfig,
logHandlers=None) client.connect()

while True:
    wlevel=random.randint(0,100)
    light=random.randint(0,100)
    myData={'Water_Level':wlevel, 'Light_Intensity':light}
    client.publishEvent(eventId="status", msgFormat="json", data=myData,
qos=0, onPublish=None) print("Published data
Successfully: %s", myData)
client.commandCallback = myCommandCallback
time.sleep(2) client.disconnect()

```

```

2021-07-17 17:18:26,965 wiotp.sdk.device.client.DeviceClient INFO Connecte
d successfully: d:d9cbnt:FirstDevice:14831
